

## 31180 Northern Hemisphere Constellations with Mythological Figures (40 Slides)

Many of you who have our constellation slides have asked us to superimpose mythological figures over them. The original constellation set was used to produce this beautiful set. Our artists drew the appropriate figures around each constellation. The end product is real stars with their proper colors and magnitudes and a deep blue figure just the right brightness to enhance the star field superimposed over the stars. There is no better way to learn the constellations than through the use of real photographs. Using both constellation sets together with two projectors makes a great teaching combination.

- |                       |                       |
|-----------------------|-----------------------|
| 1. Andromeda          | 21. Draco             |
| 2. Aquarius           | 22. Gemini            |
| 3. Aquila             | 23. Hercules          |
| 4. Aries/Triangulum   | 24. Hydra             |
| 5. Auriga             | 25. Leo               |
